

# Company profile

## Lutosa, a Belgian success story for more than 40 years!

With more than 1,200 employees at 2 production sites, we produce frozen and chilled fries, potato specialities and dehydrated flakes that delight the world 🌍

We are present in 136 countries through 24 subsidiaries and sales offices, and proudly export 94% of our production.

At Lutosa, you are joining a family business with an international dimension where team spirit, innovation and passion for the product are at the heart of everything we do.

Working with us is an opportunity to develop your skills, take on great challenges and collaborate with colleagues with diverse and exciting profiles.

🍷 **Join the Lutosa adventure and be a part of our story!**

## Function

As an IT infrastructure manager, your missions will be to manage and drive the modernization of the infrastructure at Lutosa, covering two production sites as well as the central offices in Leuze and Waregem. The role also includes the management of Lutosa's various satellite sites worldwide (sales and administrative offices).

Manage all components of the IT infrastructure, including (but not limited to): on-premise environments, license management, M365 migration and administration, cloud and hybrid environments, infrastructure strategy implementation, network management and modernization, hardware equipment, implementation of AI-related frameworks, as well as the implementation and automation of the helpdesk.

The goal is to integrate AI as a service within the infrastructure.

### Infrastructure & Network

- ✓ Drive infrastructure (on-premise & cloud) and network modernization
- ✓ Manage migration to the cloud (M365...) and optimize costs
- ✓ Standardize tools and environments (Teams, telephony, workstations)

### IT & support management

- ✓ Monitor IT assets and purchasing policies
- ✓ Set up and optimize a helpdesk tool (incidents, changes, assets)
- ✓ Provide support to internal teams (IT & OT)

### IA & innovation
